

TEXAS A&M UNIVERSITY

Collaborative for Innovation
in Teacher Education

Congratulations

Aakash Kumar

The Collaborative for Innovation in Teacher Education is proud to recognize the accomplishment of Aakash Kumar, a third-year doctoral student in the Department of Teaching, Learning, and Culture and a graduate assistant for the Collaborative.

Aakash has been selected as a finalist in Stanford University's prestigious Center on Longevity Design Challenge—a remarkable milestone, as he becomes the first student from Texas A&M University to achieve this honor.

His project, "Veritas" (Texas A&M University, USA), is a Canvas course designed to equip young students in Pakistan with fact-checking skills to counter digital misinformation on social media platforms. At a time when intolerance and religious extremism are on the rise, his initiative aims to empower individuals with the tools to discern facts from misinformation, fostering critical thinking and responsible digital engagement.

Aakash is among the top eight global finalists out of 230 teams from 120 universities across 31 countries. They will present their project at Stanford University, USA, in April.

We at CITE congratulate Aakash on this incredible achievement and wish him the best for the final round!
